OBJECTIVE

Provide a platform for small distillers to offer their products for sale via the LCBO retail network. Augment LCBO's Spirits assortment with market-relevant, locally produced product.

OVERVIEW

The Ontario Small Distiller Direct-to-Store Delivery Program (OSD DDp) allows small Ontario distilleries to directly deliver approved, locally produced spirits and liqueurs to select LCBO stores.

The OSD DDp is designed to provide Ontario small distillers with an alternative distribution option for locally distilled products. The program is best suited to products that have a strong local appeal or fill a small or localized niche market. Distillers deliver approved products directly to participating stores.

Participating distillers will be expected to support sales via in-store tastings for both customers and staff.

INSTRUCTIONS

STEP 1: Review the list of products available. *(page 4 - 13)*

STEP 2: Select the products you wish to list. You may want to consider listing products from distillers that are in your local area.

STEP 3: Expect contact from the distiller. Contact information and distributor codes are on. *(page 15 - 17)*

Direct Delivery Vendor Portal (DDVP)

If you are interested in ordering any of the products in this guide, please list the item(s) in the ISE system and order using DCM ensuring a SOQ is generated. Remember to set the Distributor Code to the proper distiller.

Delivery restrictions may apply.

SIGNAGE COMPONENTS

Retail stores should support any OSD products they have selected to list, by printing and installing a generic bin tag underlay and bin tag. The Spirits category will ensure that a tasting note is available for all participating products.

“Local” & “Crafted In Ontario” Bin Tag Underlays

- Use these underlays to further highlight local products.
- Pre-printed shelf talkers should be installed over top of the bin ticket and underlays in the plastic channel.
- Ensure the underlays message is still visible.

MERCHANDISING INSTRUCTIONS

OSD products are to be merchandised within its respective spirits set. OSD products are included in the store's SKU count and are planogrammed. The One-in/One-out rule applies.

REPLENISHING INVENTORY

Retail stores should manage inventory and order replenishment stock using DCM, ensuring a SOQ is generated. Once sufficient historical sales data is collected, DCM will generate SOQ's and forecast replenishment stock based on the store's established rate of sales.
